

WORM DAY!!!

UConn Master Composter Program
Saturday, OCTOBER 19, 2019 10 am—2 pm
Middlesex County Extension Center
1066 Saybrook Road, Haddam, CT 06438

**MAKE YOUR OWN VERMICOMPOST BIN –
YOU BRING THE MATERIALS, WE’LL BRING THE WORMS!!!**

**Please register with the UConn Home & Garden Education Center—
we need to know how many worms we will need for those making bins!**

(877) 486-6271 or email ladybug@uconn.edu.

Click here for more information on the [Master Composter Program](#).

Supplies Needed for Worm Bin:

- One 14 by 20 inch or so dark plastic (not clear plastic) storage bin with lid.
- Another storage container that this first plastic storage bin will fit into or a foil turkey cooking pan that your bin can be set in.
- Shredded newspapers for bedding, no glossy sections but the comics are okay!
- Ideally the shredded newspaper is mixed with some presoaked coconut coir. This is not essential and we will have some to share.

The first storage bin, which will contain the worms and their bedding, needs to have drainage holes drilled into it. We will have a couple of drills on hand if you are not able to make about 15 to 20 one-quarter inch holes on the bottom of the container for drainage (worm tea) and about the same on the sides for air. We will also provide some coir and sterilized soil to mix in with the shredded paper.

Worm Bin Makers - there is a suggested \$5 donation for worms, payable at door.

An equal opportunity employer and program provider.
